Accounting ACC3

Accounting gives students the tools to make real life financial decisions in a constantly changing and uncertain world. Students will develop the knowledge and skills necessary to act with integrity by being accountable for their accounting knowledge. This course is strongly recommended if students intend pursuing a commerce qualification at tertiary level.

Topics include: Demonstrate understanding of accounting concepts for a reporting entity. Demonstrate understanding of accounting for partnerships. Demonstrate understanding of company financial statement preparation. Prepare a report for an external user that interprets the annual report of a NZ reporting entity. Demonstrate understanding of management accounting to make a decision.

ART – Painting or Printmaking ART3

Level 3 Art is a practical course extending students' skills in: Creative and critical art making practice, and; Extending knowledge of methods and ideas.

Students develop their individual practice in the field of choice.

Topics include: Use drawing to demonstrate understanding of conventions appropriate to painting or printmaking. Systematically clarify ideas using drawing informed by established painting or printmaking. Produce a systematic body of work that integrates conventions and ideas with painting or printmaking practice.

ART – Visual Design AVD3

Level 3 Visual Design is a practical course developing skills in:

- Research visual design methods and ideas;
- Develop and apply ideas in response to visual design situations, and;
- Extend their practical knowledge of visual design techniques and media, including digital imaging.

Topics include: Use drawing to demonstrate understanding of conventions appropriate to design. Systematically clarify ideas using drawing informed by established design practice. Produce a systematic body of work that integrates conventions and regenerates ideas within design practice.

Biology BIO3

This course is designed for students who wish to undertake careers that involve Biology. It is an introduction to basic Biology phenomena and leads to learning beyond school.

Note: Most universities recommend two sciences be taken by students wishing to enter a University Science Programme.

Topics include: Carry out a practical investigation in a biological context. Demonstrate understanding of how animals maintain a stable internal environment. Demonstrate understanding of responses of plants and animals to their external environment. Demonstrate understanding of evolutionary processes leading to specialisation. Demonstrate understanding of human manipulation of genetic transfer and its biological implications.

Business Studies BUS3

In Business Studies, students develop their understanding of business theory and practices in a range of relevant contexts. Studying business contributes to the development of a culture of enterprise in New Zealand and supports our efforts to improve economic and community well-being.

Business is influenced by and impacts on the cultural, ethical, environmental, political and economic conditions of the day. Issues such as sustainability, citizenship, enterprise and globalisation are central.

Studying business enables students to appreciate the issues that challenge businesses and stake holders. In a rapidly changing world, it is important that citizens are able to make informed and rational decisions about business matters.

**University

Design and Visual Communication DVC3

Design and Visual Communication Level 3 leads on to a number of careers which requires design skills or the ability to understand working drawings. The focus is on spatial, product design and visual communication skills which includes producing an exhibition of work. Externals are again taken from internal assignments and focused on exploring ideas created from an inspiration point and producing working drawings using computer aid design. These are assembled in a portfolio and sent away from external marking at the end of the year.

Topics include: Initiate design ideas through exploration. Develop a visual presentation that exhibits a design outcome to an audience. Resolve a product design through graphics practice. Produce working drawings to communicate production details for a complex design.

Digital Technology Information Management DTM3

The aim of this course is to give students experience in creating computer technology solutions for clients. Students will work individually to plan design, develop, test and deploy real software for a real client. Students will be required to act as much as possible as a member of a professional software development. Some students will have the option of taking various Level 3 Standards DTP, Databases and spreadsheets website constructions as part of their programme depending on their readiness.

Topics include: Undertake brief development to address an issue within a Determined context. Undertake project management to support technical practice. Implement complex procedures to develop a relational database embedded in a specified digital outcome. Develop a conceptual design considering fit for purpose for purpose in the broadest sense. Demonstrate knowledge of the principles of computer methods. Create and use a database to solve a problem. Produce DTP documents for organisational use. Demonstrate understanding of complex concepts of information systems in an organisation.

Digital Technology Science DTS3

This course provides students with learning opportunities in a range of areas and computer applications. Students develop skills by completing projects in the areas of Programming, Computer Science and Digital Media. Students also gain essential Technology skills.

Topics include: Develop a complex computer programme for a specified task. Undertake project management to support technical practice. Demonstrate understanding of areas of computer science. Develop a prototype considering fitness for purpose in the broadest sense. Undertake a critique of a technological outcome's design. Implement complex procedures to make a specified product using a CNC machine. Implement complex procedures to produce a specified digital media outcomes. Level 1 Waikato University Paper.

Drama DRA3

Students will work collaboratively to investigate, devise, perform and reflect upon Drama with depth, creativity and perception through a range of performance opportunities. Level 3 Drama continues to foster creativity, confidence, communication, compassion, culture, collaboration and critical thinking, all which are important life skills. This course can bring to a close the NCEA Drama journey or prepare students for subsequent tertiary study in creative fields in creative fields or Dramatic and Performing Arts. Advice and guidance will be provided to students should they be considering a career in the Performing Arts.

Topics include: Devise, script and perform a drama. Interpret scripted text and integrate drama techniques for performance. Perform a substantial acting role in a significant production. Interpret live drama performance. Select and use complex performance skills associated with a drama form or period. Interpret a prescribed text to demonstrate knowledge of a theatre form or period.

Economics ECO3

Economics is the study of how people make decisions and of the forces that affect their behaviour and the shape of their institutions. Economics considers the factors that influences the well-being of people. It further develops the learning from Year 11 and Year 12, linking consumers, producers and the global economy.

Topics include: Demonstrate understanding of market equilibrium. Demonstrate understanding of the efficiency of different market structures using marginal analysis. Demonstrate understanding of micro-economics concepts. Demonstrate understanding of government interventions to correct market failures. Demonstrate understanding of macro-economic influences on the NZ economy.

English ENG3

This academic course explores a range of challenging literature in the written, visual and oral strands. Students will also participate in key practical tasks such as research, authorship and seminar delivery. Students who show early signs of mastery in this course may be invited to participate in the Year 13 Scholarship English programme. Success in this arena offers a broad range of study and career options.

Topics include: Respond critically to specified aspect(s) of studied written text(s), with supported by evidence. Develop an informed understanding of literature and/or language using critical texts OR Respond critically to significant connections across texts. Respond critically to specified aspect(s) of studied visual or oral text(s) supported by evidence. Respond critically to significant aspects of visual and/or oral text(s) through close reading, supported by evidence.

English Intermediate ENI3

The purpose of ENI3 is to meet the needs of students who are capable of working at Level 3. In particular, this course is for Year 13 students who have attained University Entrance Literacy and want to take another UE approved subject. A high standard of effort, attitude and homework is expected.

Topics include: Create and deliver a fluent and coherent oral text which develops, sustains and structures ideas. Produce a selection of fluent and coherent writing which sustains and structures ideas. Respond critically to significant aspects of visual and/or oral text(s) through close reading, supported by evidence. Respond critically to make significant connections across texts. Create a fluent and coherent visual text.

English Foundation ENL3

This course is designed to provide Year 13 students with a further opportunity to gain their University Entrance Literacy credits. Students will complete the outstanding Level 2 standards required to attain University Entrance Literacy and will then may be given opportunities to move onto Level 3 standards. This course is NOT University Approved and only **delivers up to 8 Level 3 Credits**.

Note: It is preferred that Year 12 students make every effort to gain University Entrance Literacy while in Year 12.

Topics include: Produce a selection of crafted and controlled writing. Use information literacy skills. Form developed personal responses to independently read texts, supported by evidence. Respond critically to significant connections across texts, supported by evidence. (Level 3) Respond critically to significant aspects of visual and/or oral text(s) through close reading, supported by evidence. (Level 3)

Fitness Studies FIT3

This course is an entry level qualification for the fitness industry and recognises the skills and knowledge required to function successfully at a basic level in the fitness environment. It consists of Unit Standards covering the key skill areas of customer service, safety, basic exercise prescription and good nutritional principles. The type of student this attracts suits individuals who do not see Sport Science as a viable career path at Cambridge High School.

Topics include: Demonstrate knowledge of purpose, pitfalls and use of exercise testing. Demonstrate knowledge of exercise prescription. Demonstrate knowledge of exercise physiology and human anatomy. Demonstrate quality performance of a physical activity in an applied setting.

Internal	External	L1 Literacy	L1 Numeracy	UE Reading	UE Writing	Endorsement
25						No
Prerequisites: Satisfactory completion of Level 2 Fitness Studies and/or a high level of interest in Fitness. Where does this lead: Not a University Entrance Approved Subject Parental Contribution: \$50 Days out of School: 1

Gateway GATE

Gateway is available for students interested in a particular career or industry and are work ready. In addition, they will need to be self-motivated and have a positive attitude. Students will need to be well-organised and capable of maintaining their other subject's requirements despite time away from school.

Gateway supports students undertaking learning and assessment where possible in the workplace. They are required to gain a minimum of 20 workplace credits.

Students spend approximately one day per week in a workplace appropriate to their interests. It is an advantage for the student to hold a current driver's license.

Topics include: Produce a CV and Independent living.

Internal	External	L1 Literacy	L1 Numeracy	UE Reading	UE Writing	Endorsement
24						No
Prerequisites: LIMITED ENTRY. Students and parents must have consulted with Mr Robinson before they put down Gateway on their subject choice form. Where does this lead: Not a University Entrance Approved Subject Parental Contribution: Nil Days out of School: 1 day per week in most cases in workplace learning.

[\(Back to Contents\)](#)

Geography GEO3

Students will learn key natural and cultural processes within prescribed topics. They will develop skills in analysing, identifying and explaining trends and patterns, map work, GPS application, problem solving and geographic report writing. Field work exposes students to learning experiences and content knowledge to ensure higher level understanding.

Geography is a popular qualification for employers as students are exposed to the human and physical interactions within the environment. Case studies include Natural Processes at Waihi Beach and Tourism Development within Gold Coast.

Topics include: Demonstrate understanding of how interacting natural processes shape a NZ geographic environment. Demonstrate understanding of how a cultural process shapes geographic environment. Demonstrate understanding of a given environment through the selection and application of geographic concepts and skills. Conduct geographic research with consultation. Analyse aspects of a contemporary geographic issue. Analyse aspects of a geographic topic of a global scale.

History HIS3

History aims to develop skills of enquiry, interpretation, problem solving, gathering, processing and presenting information. History at this level will further students' understanding of major trends and developments. The French Revolution, the background, personalities, course and impacts of this turning point in world history. Internal assessments will focus on early NZ History and will include a fieldwork component.

Topics include: Research a historical event or place of significance to New Zealanders. Analyse a significant event or place of significance to New Zealanders, using primary and secondary sources. Analyse different perspectives of a contested event of significance to New Zealanders. Analyse the causes and consequences of a significant historical event.

Mathematics with Calculus **MAC3**

This course places a greater emphasis on the techniques and applications of Calculus, Mathematical Modelling and the development of Mathematical reasoning. It should be taken by students who wish to further their studies in Mathematics, Engineering, Physical Sciences and anywhere else where Mathematics is used as a tool.

Topics include: Apply systems of simultaneous equations in solving problems. Apply trigonometric methods in solving problems. Apply the algebra of complex numbers in solving problems. Apply differentiation methods in solving problems. Apply integration methods in solving problems.

Mathematics Intermediate MAI3

This course gives students the skills to collect, process, analyse and display data. Two applied Mathematics standards are also covered. Students are given opportunities to analyse large quantities of data to follow trends and predict future outcomes. MAI3 is best suited to students interested in quantitative aspects of Science, Social Science, Business and any field where statistical analysis is important.

Topics include: Apply linear programming methods in solving problems. Investigate time series data. Investigate bivariate measuring data. Use statistical methods to make a formal inference. Evaluate statistical reports (optional external). Apply systems of simultaneous equations in solving problems. Conduct an experiment to investigate a situation using experimental design.

Music MUS3

The Year 13 Course is designed to meet the Level 8 curriculum objectives of the National Arts Curriculum. It allows students to achieve success with the Level 3 NCEA Music achievement or unit standards, based on individual student needs and ability. The programme will allow students to continue to develop in: performance, composition arranging, music history and analysis, music materials, music research and music technology and studio skills. Students in Level 3 Music will choose a project to work on and will be assessed in relevant standards to their project.

Projects include: Writing an original EP. Creating a video game soundtrack. Writing music for a documentary. Exploring electroacoustic music. Live performance art music. Any music related project.

Office and Computing Administration OCA3

This course will continue on with the learning of intermediate business administration and computing skills and knowledge required by the business community. Students will develop key competences such as problem solving, decision making and communication therefore gaining a good understanding of good business practice.

Completing Years 12 and 13 OCA PLUS some specific Level 3 credits will enable the student to gain the National Certificate in Business Administration and Computing (Level 3).

Topics include: Key in text at 35 words per minute. Produce text processed business documents. Identify the requirements for a financial record system. Write a report. Create a computer spreadsheet to provide a solution. Use computer accounts receivable and payable system to provide financial information. Interview in an informal one to one situation. Produce business or organisational information using word processing functions.

Performing Arts Technology PFA3

In Level 3, students build on their knowledge of Level 2 to explore advanced techniques of stage lighting, lighting design, PA systems and stage management. The students research and explore stage lighting design and complex lighting plots, rig lights for shows and run the lights for performances. The students also stage manage a performance and run sound for a performance. This course is very hands on and practical.

Topics include: Research, develop and apply a stage lighting design concept for a given work. Stage-manage a production. Select and apply a range of processes to enhance sound in a performance context. Research, develop and communicate a set design concept for a given work.

Internal	External	L1 Literacy	L1 Numeracy	UE Reading	UE Writing	Endorsement
